

Cardiovascular Risk Report

Cardiovascular Risk Report

Cardiovascular risk factors are conditions or habits that raise your risk of cardiovascular disease and events. There are traditional and innovative cardiovascular risk factors. This cardiovascular risk report provides an overview of selected cardiovascular risk factors with special attention for the AGE Reader measurement result.

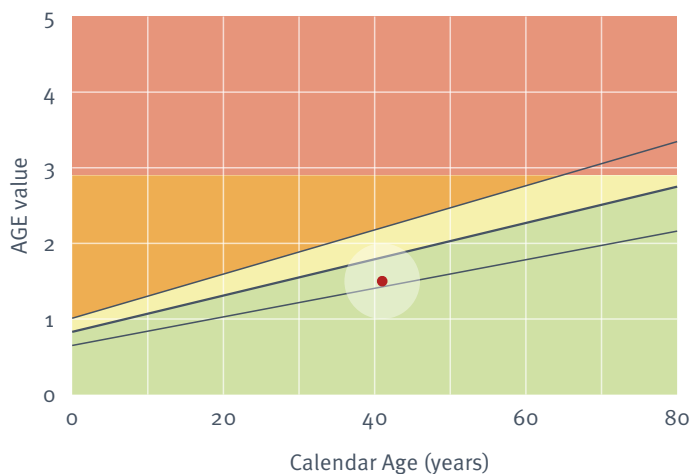

Risk Factor

Measurement result

Previous Current

AGE	-	1.5	
Smoking	-	No	
Diabetes	-	Yes	
Systolic blood pressure	-	113	
LDL cholesterol	-	95	

AGE Reader result

The AGE Reader measurement is below or equal to the age-related mean. This indicates there is no increase in cardiovascular risk. However if the subject is an elderly person and the result is above 2,5 (even though it is at the age-related mean), the subject may still have increased cardiovascular risk due to his/her calendar age.

Remarks

GIM: 0.61
 Edad Vascolar: 28 años
